

Hailey Hall School Food and Cookery Skills Curriculum Map

Food and Cookery Skills Curriculum - Intent

The intent of our Food Technology curriculum is to apply the principles of nutrition and healthy eating, instilling a love of cooking in all pupils. Learning how to cook is a crucial life skill for pupils now and in later life. Throughout their time at Hailey Hall, we aim to encourage independent learning through individual activities. The Food Technology department ensures that our pupils have a wider understanding of environmental impacts on our choice of foods and why there should be more encouragement to buy in season. Our pupils learn about multicultural foods and experience how different cultural foods influence our everyday food choices.

The department has a strong focus and drive to develop independent learners, promote high standards of personal achievement through making and evaluating dishes. The department has a strong belief that all pupils should strive to become independent and self-motivated learners, enabling our pupils to develop personal responsibility and to consider the needs of others. This equips our pupils with the knowledge and community awareness to succeed in life.

The Food Technology department follows the National Curriculum for Food Technology programme of study. Pupils will have an understanding on how to apply the principles of a healthy and varied diet following the guidance from the Eat Well Guide. Pupils will acquire a broad range of subject knowledge and draw on disciplines such as Mathematics and Science. Pupils will be competent in a range of cooking techniques, Food Technology is the practical science of chemistry, preservation and processing of food. It allows for creativity, innovation and problem solving allowing them to make informed choices about food, diet and value for money. It also allows for pupils to work in partnership with their peers in the practical lessons and peer feedback allows for students to develop their confidence within the kitchen environment.

The curriculum aims to develop individuals holistically and so, to give them the necessary skills, qualifications and experiences to access further education, employment or training. This goal is underpinned by the need to develop resilience, tolerance and all-round personal well-being. There is an emphasis on the process of learning, developing a growth mindset and practical hands-on experience.

Year 7 Food and Cookery Skills

Why this subject is important:

- It helps you to solve problems as individuals and members of a team.
- It helps you to become creative learners.
- It helps you design and make a range of products.
- It helps you to combine and to explore a range of materials.
- It helps you to improve the quality of life.

		other's dishes, giving valid reasons for their findings and opinions. • Design and make a product.	Year 8 pupils will independently taste test their dishes and season accordingly to suit their end user. Evaluating dishes begins in year 8, with more in-depth evaluations in year 9.
Term/ Unit: Summer	History of foods	 Understand how food has developed over the years. Look at how cooking styles have changed. Follow and interpret older recipes and apply more modern techniques to the dishes. Investigate how the storage of foods has changed. What different countries offer to our diet. 	Year 8, using the knowledge learned in the history of food to enhance the learning of Foods from around the world. Year 8 pupils will look how we safely and hygienically store and transport foods from around the world. Year 8 pupils will investigate food Air Miles, and look at the greater impact this has on lives around the world.

Pupils develop their self-knowledge, self-esteem and self-confidence. Pupils acquire a broad general knowledge of and respect for public institutions and services in Britain. Pupils develop respect for themselves and learn to respect other people. Pupils develop the skills to evaluate the values and arguments of people wanting their support or their vote.

How you will be assessed:

At the end of each term, you will be assessed on that project and the practical work that has been completed.

Learning outside the classroom:

BBQ, growing and using food from allotments.

How parents / carers can help:

Provide them with a quiet place to do homework and revision. Talk to your child about what they are learning in lessons, perhaps getting them to teach you what they have been learning. Encourage your child to cook and make things using a range of materials at home.
